

Mit Verdopplungs- und Nachbaraufgaben rechnen (3)

1 Löse zuerst die mittlere Aufgabe.

$$\begin{array}{r} 5 + 3 = 8 \\ 5 + 4 = 9 \\ \hline 5 + 5 = \square \end{array}$$

$$\begin{array}{r} 7 + 5 = \square \\ 7 + 6 = \square \\ \hline 7 + 7 = \square \end{array}$$

$$\begin{array}{r} 6 + 4 = \square \\ 6 + 5 = \square \\ \hline 6 + 6 = \square \end{array}$$

$$\begin{array}{r} 8 + 4 = \square \\ 8 + 5 = \square \\ \hline 8 + 6 = \square \end{array}$$

$$\begin{array}{r} 9 + 6 = \square \\ 9 + 7 = \square \\ \hline 9 + 8 = \square \end{array}$$

$$\begin{array}{r} 7 + 5 = \square \\ 7 + 6 = \square \\ \hline 7 + 7 = \square \end{array}$$

$$\begin{array}{r} 9 + 1 = \square \\ 9 + 2 = \square \\ \hline 9 + 3 = \square \end{array}$$

$$\begin{array}{r} 8 + 5 = \square \\ 8 + 6 = \square \\ \hline 8 + 7 = \square \end{array}$$

$$\begin{array}{r} 8 + 6 = \square \\ 8 + 7 = \square \\ \hline 8 + 8 = \square \end{array}$$

$$\begin{array}{r} 5 + 5 = \square \\ 5 + 6 = \square \\ \hline 5 + 7 = \square \end{array}$$

$$\begin{array}{r} 4 + 5 = \square \\ 4 + 6 = \square \\ \hline 4 + 7 = \square \end{array}$$

$$\begin{array}{r} 9 + 7 = \square \\ 9 + 8 = \square \\ \hline 9 + 9 = \square \end{array}$$

$$\begin{array}{r} 8 + 2 = \square \\ 8 + 3 = \square \\ \hline 8 + 4 = \square \end{array}$$

$$\begin{array}{r} 3 + 7 = \square \\ 3 + 8 = \square \\ \hline 3 + 9 = \square \end{array}$$
